1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	Prime Number V2	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The program will ask the user to input a number of your choice. This number is going to be calculated whether it is prime or not.	Program will calculate the number if it is prime or not by determining if the number is bigger than 1, then after using the boolean function, that deciphers if it has 2 factors or more.	The program will output your number, with a brief descriptions describing if your number is prime or not.
